DETAILED ACTION

1. The indicated allowability of claims 3-5 is withdrawn in view of the newly discovered reference(s) to Stearns. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang. Wang discloses a frame (102); seat (108) and resistance engine (160), and an actuator (112). Wang discloses all of the limitations of the claimed invention except for the resistance being from springs. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the resistance for a device since an equivalent resistance mechanism is capable of serving the same functional purpose.

Allowable Subject Matter

4. Claims 6-8 and 73 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 9-72 and 74-76 are allowed.
